Re: Product Owner, DarioHealth

Dear Hiring Team,

Dario's mission — to make better health easy — is exactly the kind of problem I want to spend my days on: real users, real outcomes, and a product that has to be genuinely simple to work. I'm a Gurugram-based Product Owner / Product Manager with 5+ years owning a backlog end-to-end for a direct-to-consumer mobile product, and I'd be glad to bring that ownership — and a real enthusiasm for building — to your team.

For the past five years at PlanetSpark I've owned the full product backlog for a DTC EdTech platform — defining, grooming, and prioritizing work against product vision and business goals, balancing features, enhancements, bug fixes, and technical debt, and communicating the rationale openly to stakeholders and engineering. I run Agile/Scrum day-to-day: backlog refinement, sprint planning, precise and testable acceptance criteria, and staying available through the sprint to clear ambiguity and keep the team unblocked. I lean on data to decide — dashboards, KPIs, and A/B test results tell me when priorities need to shift, and I adjust quickly.

What I think sets me apart for this role is that AI isn't a buzzword in my workflow — it's how I work. I ship with it (a production GenAI learning layer and an NLP support chatbot) and I use LLMs every day for research, documentation, prototyping, and experimentation, then bring the team along as new tools emerge. That's the same 'champion AI-powered ways of working' energy your JD describes, and it's genuine.

I also thrive on ambiguity and on shipping. I led the 0->1 launch of our direct-to-consumer mobile app MVP in two months, re-architected the sign-up-to-enrolment funnel (single-step OTP, six API-integrated payment gateways) to cut drop-off, and drove 20% revenue growth, 25% ARPU expansion, and Rs 70L in product-led renewals in a single month. I'm comfortable enough with SDLC, APIs, and system fundamentals to ask engineering sharp questions and weigh trade-offs, and I work fluently in Jira, Confluence, and Figma.

I'm based in Gurugram and excited by the chance to point this experience at something as meaningful as health. I'd welcome the opportunity to talk about how I can help Dario build. Thank you for your time and consideration.

Warm regards,

Kshitiz Yadav
