Product Manager

Sep 2023 – Present

- Re-architected the sign-up → demo → enrolment funnel — single-step OTP, a preference-capture ranking model, and 6 API-integrated payment gateways with pre-filled links and auto-cleared approvals — enabling self-serve, plan-based purchase with no manual intervention.
- Designed an in-product renewal engine (nudges, early-bird access, LMS free-trial classes, teacher-initiated renewals) that reduced assisted-renewal cost and generated ₹70L in product-led renewals in a single month (Jan 2025).
- Increased the share of enrolled users rating the product 5 out of 5 from 10% to 25% via onboarding and retention work: seamless onboarding, teacher PTMs and feedback, a one-page student-detail UI, a loyalty program, and the PSpark in-app wallet.
- Shipped a production GenAI learning layer (age-appropriate speech/text responses) and a RAG-based support chatbot — cutting first-response time from 4 minutes to under 10 seconds and monthly escalations from ~300 to under 50 within three months.
