PROFESSIONAL SUMMARY

Product Manager with 5+ years taking technical products from conception to launch (0 to 1) — including reporting and insights platforms and internal enterprise/platform tooling. Conducts market research and competitive analysis, translates customer needs into a prioritized roadmap, collaborates with engineering and design on specifications, user experience, and technical architecture, and drives launches, go-to-market, and adoption. Executes in ambiguity and influences cross-functional stakeholders. Track record of 20% revenue growth and ₹70L in product-led renewals.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram · Mar 2021 – Present

Own the full product suite of a consumer marketplace connecting students and teachers via a shared LMS — a software platform spanning consumer app, LMS, sales CRM, reporting/insights, and an in-house AI layer — taking products from conception to launch and partnering across engineering, design, analytics, finance, and operations.

Reporting & Insights Platform · Enterprise Tooling

- Built reporting and insights capabilities: Power BI dashboards from Metabase SQL for Marketing, Sales, and Operations — establishing KPIs, reporting standards, and the deeper, detailed insights teams needed to act.
- Built internal enterprise/platform tooling 0→1 — a Sales CRM (revenue tracking, target-vs-achievement) and an in-house video-call platform (replacing a vendor) — plus a counselor-wise P&L tracker giving a real-time view of unit economics.
- Monitored and analyzed product performance (key metrics, conversion) and gathered customer feedback to measure success and identify areas for improvement.

Conception to Launch (0→1) & Roadmap

- Took technical products from conception to launch: led the 0→1 consumer app MVP in 2 months and re-architected the sign-up → enrolment funnel (single-step OTP, best-fit ranking, 6 API-integrated payment gateways).
- Conducted market research, customer analysis, and competitive analysis to understand needs and pain points, and translated them into a prioritized roadmap of features and enhancements.

Cross-Functional, GTM & Technical Collaboration

- Collaborated with engineering and design on product specifications, user experience, and technical architecture (system design, APIs, integrations) to deliver solutions at scale; drove launches, GTM, and adoption with marketing and sales.
- Executed in ambiguity and influenced stakeholders across engineering, design, analytics, finance (unit economics), and operations; shipped a production GenAI layer and automation that cut operational workload 80%.
