PROFESSIONAL SUMMARY

Product Manager with 5+ years building and scaling technology products in a B2C market -- owning product vision, roadmap, and day-to-day execution end-to-end. Gathers, evaluates, and defines detailed product requirements and specifications, translating stakeholder and client needs into scalable solutions. Runs competitor analysis and tracks industry trends, applying analytical, data-driven problem-solving (SQL, Power BI, A/B testing) to influence cross-functional teams and drive measurable business outcomes: 20% revenue growth, 25% ARPU expansion, ₹70L in product-led renewals, and 2,000+ organic leads/month at 7% conversion. Ships production AI/LLM features as a genuine differentiator.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram • Mar 2021 – Present

Own the full product suite of a B2C EdTech marketplace -- one of India's largest public speaking & creative writing platforms, connecting students and teachers via a shared LMS: consumer app, student & teacher LMS, sales CRM, product-led growth & renewal engine, and an in-house AI layer.

Product Vision, Roadmap & Requirements Ownership

- Owned the product vision, strategy, and roadmap for a B2C marketplace platform end-to-end, gathering and defining detailed requirements and specifications: single-step OTP onboarding, a preference-capture ranking model, vendor-integrated payment gateways (Razorpay, PayU, PayGlocal, PayPal, Bajaj), and auto-cleared approvals -- cutting drop-off across every stage.
- Led the 0→1 launch of a consumer app MVP in 2 months (Feb–Mar 2024: ~1% organic revenue, +10% engagement), influencing engineering, design, and business stakeholders to drive strategic product decisions; built the Student LMS, raising course completion 15%.

Market Success, Growth & Commercial Acumen

- Built the LPP module -- validated and iterated via A/B testing -- driving 20% revenue growth, 25% ARPU expansion (₹35K → ₹45K), and 50% higher revenue per class (₹600 → ₹900), demonstrating a track record of growing a product line to market success.
- Designed an in-product renewal engine, generating ₹70L in renewals in a single month; ran competitor analysis and tracked industry trends to launch organic acquisition loops, bringing 2,000+ organic leads/month at a 7% conversion rate.

AI/ML Product Development & Data-Driven Execution

- Shipped a production GenAI layer and built "Demo Analysis," a self-customized in-house AI feature analyzing demo-session customer behavior to surface a customized course plan to the counselor for the sales conversation.
- Built multiple insight-driven Power BI dashboards (sourced from Metabase SQL queries) for cross-functional teams, enabling continuous performance tracking and data-driven decision-making.
