PROFESSIONAL SUMMARY

AI-first Product Manager with 5+ years owning the full product lifecycle -- problem framing through PRD, experimentation, and scaled rollout -- for a transactional B2C consumer platform. Ships production AI/LLM features (GenAI layer, in-house chatbot) as first-class product building blocks, not add-ons, and uses AI tooling (Gemini, Claude, ChatGPT, Codex) to compress cycle time in daily execution. Runs a tight experimentation cadence (A/B testing, funnel diagnostics, SQL, Power BI dashboards) to move top-line metrics: 20% revenue growth, 25% ARPU expansion, ₹70L in product-led renewals, and 2,000+ organic leads/month at 7% conversion.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager Gurugram • Mar 2021 – Present
Own the full product suite of a B2C EdTech marketplace -- one of India's largest public speaking & creative writing platforms, connecting students and teachers via a shared LMS: consumer app, student & teacher LMS, sales CRM, product-led growth & renewal engine, and an in-house AI layer.

AI/LLM Product Development & Automation

- Shipped a production GenAI layer (speech/text learning with contextual, age-appropriate responses) and an in-house support chatbot, using AI tooling (Gemini, Claude, ChatGPT, Codex) aggressively in day-to-day execution to compress iteration cycle time.
- Built "Demo Analysis," a self-customized in-house AI feature embedding personalization and intent-understanding into demo-session behavior analysis -- surfacing a customized course plan to the counselor for the sales conversation, informed by real-time customer behavior and feedback.

Marketplace Product: Supply & Demand-Side Ownership

- Owned both sides of a two-sided marketplace connecting students (demand) and teachers (supply) via a shared LMS: built teacher-facing supply-side tools (payout history, current-payout visibility, demo-performance analysis, and demo-to-enrolment conversion analysis) alongside the student-facing engagement layer (games, activities, practice classes, per-class teacher feedback, PTMs).
- Owned end-to-end problem framing → PRD → experimentation → scaled rollout for the sign-up → demo → enrolment funnel: single-step OTP, a preference-capture ranking model, vendor-integrated payment gateways (Razorpay, PayU, PayGlocal, PayPal, Bajaj) handling transaction creation and status verification, cutting drop-off across every funnel stage.

Metrics, Retention & Cross-Functional Delivery

- Built the LPP module -- validated and iterated via A/B testing -- driving 20% revenue growth, 25% ARPU expansion (₹35K → ₹45K), and 50% higher revenue per class (₹600 → ₹900); designed an in-product renewal engine generating ₹70L in renewals in a single month.
- Ran market research and funnel diagnostics to launch organic acquisition loops, bringing 2,000+ organic leads/month at a 7% conversion rate; built multiple insight-driven Power BI dashboards (sourced from Metabase SQL queries) for cross-functional visibility, leading collaboration with engineering, design, and business stakeholders throughout.
