PROFESSIONAL SUMMARY

Product Manager with 5+ years owning the full B2C product lifecycle across a consumer app, a two-sided student/teacher LMS, a sales CRM, and a product-led growth & renewal engine at a high-growth EdTech startup. Consistent record of moving core metrics — 20% revenue growth, 25% ARPU expansion, ₹70L in product-led renewals, and 2,000+ organic leads/month at 7% conversion. PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram · Mar 2021 – Present

Own the full product suite of a B2C EdTech startup: consumer app, student & teacher LMS, sales CRM, product-led growth & renewal engine, and an in-house AI layer.

Growth & Monetization

- Built the LPP (Learn, Practice, Perform) module — customized 1:1 sessions, group activities, and performance tasks — driving 20% revenue growth, 25% ARPU expansion (₹35K → ₹45K), and 50% higher revenue per class (₹600 → ₹900).
- Designed an in-product renewal engine (nudges, early-bird access, LMS free-trial classes, teacher-initiated renewals) that lowered sales cost and generated ₹70L in renewals in a single month (Jan 2025).
- Launched organic acquisition loops surfacing student progress (Sparkline, Word Wisdom, practice classes, workshops) across social channels, bringing 2,000+ organic leads/month at a 7% conversion rate.

Funnel & Platform (0→1)

- Re-architected the sign-up → demo → enrolment funnel: single-step OTP sign-in (replacing a two-step create-then-login flow), a preference-capture ranking model that surfaces best-fit courses during the counselor VC, 6 API-integrated payment gateways with pre-filled links, and auto-cleared parent-approval on payment — reducing drop-off across the sign-up, payment, and enrolment stages.
- Led the 0→1 launch of the consumer app MVP in 2 months (Feb–Mar 2024: ~1% organic revenue, +10% engagement); built the Student LMS (live classes, feedback reports, PTMs, in-house meeting room), raising course completion 15% and improving NPS.

AI, Design & Automation

- Designed prototypes and MVP interfaces for the app, LMS, and CRM in Figma, Adobe Express, and Canva AI — using Gemini, Claude, ChatGPT, and Codex to accelerate iteration into clickable flows that aligned engineering and stakeholders before build.
- Shipped a production GenAI layer (speech/text learning with contextual, age-appropriate responses) and a support chatbot that cut escalations; revamped the Sales CRM (lead navigation, integrated calling, revenue tracking, target-vs-achievement, incentive management), cutting sales-ops workload 80%.
- Automated incentive flows and enrolment verification (100% coverage), saving ₹1.6L/month and eliminating fake-revenue reporting.
