PROFESSIONAL SUMMARY

Product Manager with 5+ years owning the roadmap and execution for a product area end-to-end — from ideation to launch — across the zero-to-one and one-to-ten journeys. Defines, tracks, and improves product KPIs aligned to business goals; mentors PMs/APMs and leads cross-functional pods (design, engineering, analytics, operations); and brings strong user research, data analytics, and systems thinking. High-ownership with a bias for action; writes tight PRDs and aligns stakeholders. Track record of 20% revenue growth and ₹70L in product-led renewals.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram • Mar 2021 – Present

Own the full product suite of a consumer marketplace connecting students and teachers via a shared LMS — consumer app, LMS, sales CRM, and an in-house AI layer — owning the roadmap and outcomes, and partnering across design, engineering, analytics, supply (teacher) and operations stakeholders.

Roadmap, KPIs & Zero-to-One → One-to-Ten

- Own the roadmap and execution end-to-end (ideation to launch), ruthlessly prioritizing for outcomes not outputs: led the zero-to-one launch of the consumer app MVP in 2 months, then scaled the product (one-to-ten) — Student LMS, funnel, and growth loops.
- Defined, tracked, and improved product KPIs aligned to business goals — built the LPP monetization module (20% revenue growth, 25% ARPU ₹35K → ₹45K) and an in-product renewal engine (₹70L renewals in a single month).
- Re-architected the sign-up → enrolment funnel (single-step OTP, best-fit ranking, 6 payment gateways) to lift conversion, and ran experimentation and user research to decide what to build.

Mentoring, Pod Leadership & Cross-Functional Delivery

- Trained and led a team of 8 as Assistant Product Manager — mentoring and shaping team members — and now lead cross-functional pods of designers, engineers, analysts, and supply/operations stakeholders to ship high-impact products.
- Wrote crisp product specs / tight PRDs and aligned stakeholders effortlessly; navigated ambiguity with a high-ownership, bias-for-action mindset.

Systems Thinking, Data & AI

- Applied systems thinking to trace features end-to-end across frontend, backend, partner APIs, and ops workflows; made decisions with data analytics (SQL via Metabase → Power BI, GA4, A/B testing).
- Shipped a production GenAI layer and automated core processes (verification, incentives), cutting operational workload 80% and cutting fake sales from 10% to 1%.
