

KSHITIZ YADAV

Product Manager | Deep SQL & Data Analysis | First-Principles Problem Solving | Sprint & Backlog Ownership | APIs & Backend
Gurugram, India • +91 8756972501 • kshitizyadav788@gmail.com • linkedin.com/in/kshitizyadav

PROFESSIONAL SUMMARY

Product Manager with 5+ years at the intersection of product, data, tech, and business — writing complex SQL, building and validating dashboards, and turning ambiguous inputs into clear problem statements using first-principles thinking. Owns execution end-to-end: manages sprints, writes user stories and acceptance criteria, prioritizes the backlog, and partners with engineering on data validation, APIs, and backend systems. A data-driven decision-maker who challenges assumptions, balances user impact, business outcomes, and tech complexity in trade-offs, and iterates on feature performance post-launch. Payments product experience (6-gateway integration) and a record of 20% revenue growth, 25% ARPU expansion, and ₹1.6L/month in automation savings.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram · Mar 2021 – Present

Own the full product suite of a B2C EdTech marketplace -- one of India's largest public speaking & creative writing platforms, connecting students and teachers via a shared LMS: consumer app, student & teacher LMS, sales CRM, product-led growth & renewal engine, and an in-house AI layer.

Data, SQL & Metric Validation

- Write complex SQL and build/maintain insight-driven Power BI dashboards (sourced from Metabase queries) for Marketing, Sales, and Operations — independently validating metrics, questioning data quality, and working with tech/analytics teams to fix gaps in data.
- Turn ambiguous inputs into clear problem statements using first-principles thinking, breaking complex business problems into solvable product and data questions.

Execution Ownership (sprints, stories, backlog)

- Manage delivery end-to-end in Agile / JIRA — writing user stories and acceptance criteria, prioritizing the backlog, and working closely with engineering on data validation, APIs, and backend systems for timely delivery.
- Re-architected the sign-up → payment → enrolment funnel and automated backend revenue-punching (100%→5%, then 60%→2%), acting as a cross-functional liaison between tech, business, and analytics.

Trade-offs, Stakeholders & Iteration

- Make product decisions balancing user impact, business outcomes, and tech complexity — articulating trade-offs clearly — and manage stakeholders across internal leadership and external partners (6 payment gateways, messaging and telephony vendors).
- Track feature performance post-launch via event tracking (GA4) and experimentation (A/B testing), iterating on data and user behaviour — driving 20% revenue growth, 25% ARPU expansion, and ₹70L in renewals in a single month.

CORE COMPETENCIES

SQL & Deep Data Analysis · Dashboards & Metric Validation · First-Principles Problem Solving · Sprint Management (Agile/Scrum) · User Stories & Acceptance Criteria · Backlog Prioritization · Data Validation, APIs & Backend Systems · Cross-Functional Liaison (Tech, Analytics, Business, Design) · Stakeholder Management · Reasoning & Trade-offs · Event Tracking & Experimentation · Post-Launch Performance & Iteration

TECHNICAL SKILLS & TOOLS

- Data & Analytics:** SQL, Power BI, Metabase, GA4, MS Excel (Advanced), Python (basic)
- Product & Delivery:** JIRA, Confluence, Agile/Scrum, sprint & backlog management, RICE
- Tech & Integration:** REST APIs, data validation, backend automation, event tracking
- AI & Tools:** OpenAI / Gemini / Claude APIs, prompt engineering, A/B testing

EDUCATION

BBA — Chandigarh University, Chandigarh

2019 – 2021

Class XII (ISC), St. Thomas High School, Kanpur

2018

CERTIFICATIONS

- Product Management Certification — Udemy (2024)
- JIRA Certification — Udemy (2024)
