PROFESSIONAL SUMMARY

Product Manager with 5+ years owning products end-to-end — from discovery and PRDs through launch, experimentation, and iteration — across consumer apps, a two-sided marketplace, and internal platform and CRM systems. Partners closely with engineering, design, and business teams, using data (SQL, Power BI, GA4) and AI to move core metrics. Track record of driving 20% revenue growth and ₹70L in product-led renewals.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram • Mar 2021 – Present

Own the full product suite of a B2C EdTech marketplace -- one of India's largest public speaking & creative writing platforms, connecting students and teachers via a shared LMS: consumer app, student & teacher LMS, sales CRM, product-led growth & renewal engine, and an in-house AI layer.

Growth & Monetization

- Built the LPP (Learn, Practice, Perform) module — customized 1:1 sessions, group activities, and performance tasks — driving 20% revenue growth, 25% ARPU expansion (₹35K → ₹45K), and 50% higher revenue per class (₹600 → ₹900).
- Designed an in-product renewal engine (nudges, early-bird access, LMS free-trial classes, teacher-initiated renewals) that lowered sales cost and generated ₹70L in renewals in a single month (Jan 2025).
- Launched organic acquisition loops surfacing student progress (Sparkline, Word Wisdom, practice classes, workshops) across social channels, bringing 2,000+ organic leads/month at a 7% conversion rate.
- Built a counselor-wise P&L tracker computing weekly profitability per sales counselor (Net Revenue – Fixed, Refund, Marketing & Sales cost), giving each counselor the revenue figure needed to turn profitable — putting unit-economics visibility in the hands of the front line.

Funnel & Platform (0→1)

- Re-architected the sign-up → demo → enrolment funnel: single-step OTP sign-in (replacing a two-step create-then-login flow), a preference-capture ranking model that surfaces best-fit courses during the counselor VC, 6 API-integrated payment gateways with pre-filled links, and auto-cleared parent-approval on payment — reducing drop-off across the sign-up, payment, and enrolment stages.
- Led the 0→1 launch of the consumer app MVP in 2 months (Feb–Mar 2024: ~1% organic revenue, +10% engagement); built the Student LMS (live classes, feedback reports, PTMs, in-house meeting room), raising course completion 15% and improving NPS.

AI, Design & Automation

- Designed prototypes and MVP interfaces for the app, LMS, and CRM in Figma, Adobe Express, and Canva AI — using Gemini, Claude, ChatGPT, and Codex to accelerate iteration into clickable flows that aligned engineering and stakeholders before build.
- Shipped a production GenAI layer (speech/text learning with contextual, age-appropriate responses) and a support chatbot that cut escalations; revamped the Sales CRM (lead navigation, integrated calling, revenue tracking, target-vs-achievement, incentive management), cutting sales-ops workload 80%.
- Automated incentive flows and enrolment verification (100% coverage), saving ₹1.6L/month and eliminating fake-revenue reporting.
