20% Revenue Growth • 25% ARPU Expansion (₹35K → ₹45K) • ₹70L Renewals in a Single Month • 80% Lower Ops Workload

PROFESSIONAL SUMMARY

Product Manager with 5+ years owning the full product lifecycle — problem definition, PRD, execution, launch, and iteration — for a consumer marketplace serving 150,000+ users. Makes decisions on business metrics, user behavior, and data, and has built and scaled products that moved conversion, revenue, retention, cost efficiency, and operational metrics. Owns pricing and promotions (25% ARPU growth), works with engineering in sprint cycles, breaks ambiguous problems into structured solutions, and runs experiments to keep improving product performance.

CORE COMPETENCIES

Pricing & Promotions • Monetization & ARPU • Full Product Lifecycle (Problem to Iteration) • PRDs & Prioritization • Conversion & Funnel Optimization • Retention & Lifecycle • Cost Efficiency & Operational Metrics • Business Metrics & Data Insights • A/B Testing & Experimentation • Ambiguity to Structured Solutions • Sprint Execution with Engineering • SQL & Dashboards • Cross-Functional Alignment • Product Management

PROFESSIONAL EXPERIENCE

PlanetSpark — Gurugram

A B2C subscription marketplace (EdTech) connecting 150,000+ enrolled users with teachers via a shared LMS — spanning consumer app, two-sided platform, payments, CRM, renewals, and lifecycle products, with 30,000+ daily active users. Progressed across three roles while owning an expanding product surface.

Product Manager

Sep 2023 – Present

- Own the full product lifecycle for a platform with 150,000+ users — from problem definition and PRD through execution, launch, and iteration — working with engineering in sprint cycles.
- Re-architected the conversion funnel (single-step OTP, a ranking model, and 6 payment gateways), lifting conversion and enabling self-serve, plan-based purchase.
- Designed a renewal and promotions engine (early-bird offers, nudges, loyalty, wallet) that generated Rs 70L in product-led renewals in a single month and improved retention.
- Built a P&L and product-KPI tracker, using SQL and Power BI to drive decisions on business and operational metrics (profitable advisors rose from ~50 to 125 over three months).

Assistant Product Manager

Sep 2022 – Aug 2023

- Owned pricing, packaging, and promotions for a price-sensitive market (segment-wise minimum ARPU and phased increases) — driving 25% ARPU expansion (Rs 35K to Rs 45K) and 20% revenue growth.
- Broke an ambiguous, manual operations problem into a structured solution: automated enrolment, verification, and backend workflows — improving cost efficiency by cutting operational workload 80% and saving Rs 1.6L/month.

Senior Product Analyst

Mar 2021 – Aug 2022

- Ran A/B experiments and built SQL and Power BI dashboards (from Metabase data) to read user behavior, find drop-offs, and continuously improve product performance.
