## PROFESSIONAL SUMMARY

Product Manager with 5+ years crafting user-centered product strategy based on tradeoffs and the competitive landscape, and delivering measurable outcomes with engineering, design, operations, analytics, finance, and compliance. Builds AI/ML products end-to-end (production GenAI, LLMs), is hands-on data-fluent (SQL, Excel), and discusses HLDs/LLDs with engineering to make solutions work at scale. Radically customer-obsessed, with first-principles, data-driven decisions. Track record of 20% revenue growth and ₹70L in product-led renewals.

## PROFESSIONAL EXPERIENCE

### PlanetSpark — Product Manager

Gurugram • Mar 2021 – Present

Own the full product suite of a consumer marketplace connecting students and teachers via a shared LMS — consumer app, LMS, sales CRM, and an in-house AI/ML layer — crafting user-centered product strategy and delivering measurable outcomes across engineering, design, operations, analytics, finance, and compliance.

#### AI/ML Product Development

- Built and shipped AI/ML products end-to-end: a production GenAI learning layer, an NLP support chatbot that cut escalations, and 'Demo Analysis' — an ML feature that analyzes user behavior to surface ranked, personalized plans — using LLMs and prompt engineering.
- Identified opportunities to automate workflows and improve decision-making with AI, and rapidly showcased ideas with AI-assisted prototypes (Figma + LLMs) before engineering cycles.

#### User-Centered Strategy, Outcomes & Data

- Crafted product strategy from user pain points, tradeoffs, and competitive analysis into a clear roadmap — re-architected the sign-up → enrolment funnel and built the LPP monetization module (20% revenue growth, 25% ARPU ₹35K → ₹45K, ₹70L renewals).
- Made first-principles, data-driven decisions with hands-on data fluency (SQL via Metabase, Advanced Excel, GA4, A/B testing), and tracked conversion and success metrics to iterate.
- Discussed HLDs/LLDs and system design with engineering — funnel re-architecture, 6 API-integrated payment gateways, and integrations — to ensure solutions work at scale.

#### Cross-Functional, Customer Obsession & Ownership

- Built and leveraged cross-functional relationships across engineering, design, operations, analytics, finance (unit economics/P&L), and compliance (verification/fraud) — cutting through clutter to align stakeholders.
- Operated with radical customer centricity and an ownership mindset — shipped a customer-verification flow (fake sales 10% → 1%) and automation that cut operational workload 80%.
