PROFESSIONAL SUMMARY

Product Manager with 5+ years in consumer technology owning product areas end-to-end — strategy, roadmap, and execution. Drives growth and conversion through funnel optimization and experimentation, and simplifies complex user journeys by removing friction and redesigning flows into intuitive, reliable, scalable experiences. Highly analytical (data, A/B testing, customer insights), high-ownership, and ships fast with Engineering and Design. Track record of 20% revenue growth and ₹70L in product-led renewals.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram • Mar 2021 – Present

Own the full product suite of a consumer marketplace connecting students and teachers via a shared LMS — consumer app, LMS, sales CRM, and an in-house AI layer — owning strategy and roadmap for core journeys and partnering closely with Engineering and Design to ship fast.

Growth, Conversion & Journey Simplification

- Simplified a complex sign-up → demo → enrolment journey by removing friction and redesigning flows: single-step OTP sign-in (replacing a two-step create-then-login flow), a best-fit course ranking model, 6 API-integrated payment gateways with pre-filled links, and auto-cleared parent-approval — reducing drop-off across acquisition, onboarding, payment, and the core journey.
- Drove growth and conversion through experimentation (A/B testing) and funnel optimization; launched organic acquisition loops bringing 2,000+ leads/month at a 7% conversion rate.
- Built the LPP monetization module driving 20% revenue growth and 25% ARPU expansion (₹35K → ₹45K), plus ₹70L in product-led renewals in a single month.

Ownership, Analytics & Reliable, Scalable Experiences

- Owned a meaningful product area end-to-end: led the 0→1 launch of the consumer app MVP in 2 months and built the Student LMS (live classes, feedback, PTMs) — raising course completion 15% and improving NPS.
- Made product decisions with data and customer insights (SQL via Metabase → Power BI, GA4, A/B testing), prioritizing ruthlessly and making trade-offs to ship high-quality products quickly.
- Handled operational edge cases and compliance/verification constraints — a customer-verification flow cut fake sales from 10% to 1%, improving reliability and trust.

AI-First Product Development

- Shipped a production GenAI layer (contextual, age-appropriate speech/text learning) and an NLP support chatbot, and prototyped fast in Figma with AI (Gemini, Claude, ChatGPT) — aligning Engineering and stakeholders before build.
- Revamped the Sales CRM and automated core processes (verification, incentives), cutting operational workload 80% and saving ₹1.6L/month.

CORE COMPETENCIES

Product Strategy, Roadmap & Ownership • Growth & Conversion (Funnel Optimization, Experimentation) • Simplifying Complex User Journeys • Friction Reduction & Flow Redesign • Acquisition & Onboarding • Data-Driven Decisions & Customer Insights • Cross-Functional Execution (Engineering, Design) • Prioritization & Trade-offs • Consumer & AI-First Product Development • Scalable, Reliable Experiences • Edge Cases, Operational & Compliance Constraints • Customer Experience • Stakeholder Management

TECHNICAL SKILLS & TOOLS

- Growth & Analytics:** Funnel optimization, A/B testing/experimentation, SQL, Metabase, Power BI, GA4, customer insights
- Product & Delivery:** Product strategy, roadmap, PRDs, user stories, prioritization (RICE), trade-off analysis, JIRA, Confluence, Agile/Scrum
- AI & Prototyping:** LLM APIs (OpenAI/Gemini/Claude), Prompt Engineering, NLP; Figma, wireframing, clickable prototypes
- Integrations:** REST APIs, payment-gateway integration (Razorpay, PayU, PayGlocal, PayPal), verification/compliance flows
