Product Manager

Sep 2023 – Present

- Re-architected the discovery-to-conversion funnel — single-step OTP, a preference-capture ranking and personalisation model, and 6 API-integrated payment gateways — lifting conversion and enabling self-serve purchase.
- Shipped production AI/LLM features — a GenAI learning layer and a RAG-based assistant (first response 4 minutes to under 10 seconds, escalations ~300 to under 50) — and ship product changes end-to-end using AI coding agents (Claude Code) to compress cycle time.
- Moved retention and adoption, raising the share of users rating the product 5 out of 5 from 10% to 25% through onboarding, a loyalty program, and lifecycle work.
- Built an advisor-level P&L and product-KPI tracker, using SQL and Power BI to instrument metrics, run funnel diagnostics, and drive interventions (profitable advisors ~50 to 125 over three months).

Assistant Product Manager

Sep 2022 – Aug 2023

- Owned pricing and the LPP module for a price-sensitive market — driving 20% revenue growth and 25% ARPU expansion (Rs 35K to Rs 45K) through structured problem framing, PRDs, and rollout.
- Rebuilt the teacher/partner platform with payout automation and consolidated performance visibility, lifting NPS from -20 to +40.

Senior Product Analyst
