20% Revenue Growth • 25% ARPU Expansion (₹35K → ₹45K) • ₹70L Renewals in a Single Month • 80% Lower Ops Workload

PROFESSIONAL SUMMARY

Product Manager with 5+ years owning high-impact, cross-functional projects end-to-end, from scoping to execution, at a high-growth consumer platform serving 150,000+ users and 30,000+ daily actives. Goes deep with engineering on technical solutioning: translating business requirements into scalable functional flows and stitching together systems and third-party integrations. Led 0-to-1 product builds (consumer app MVP in 2 months, in-house platforms) and complex integrations (6 payment gateways, omnichannel systems), and writes SQL queries for data analysis and product decisions. Thrives in fast, unstructured environments with high ownership.

CORE COMPETENCIES

0-to-1 Product Building • Product Roadmap & Planning • Product Lifecycle Management • Technical Solutioning & System Integration • Business Requirements to Scalable Flows • Third-Party / External Partner Integration • End-to-End Project Ownership (Scoping to Execution) • Cross-Functional Execution (Engineering, Ops, Product) • SQL & Data-Driven Decisions • Problem Solving • Workflow Automation • Prioritization (RICE) • Stakeholder Management • Product Management • High Ownership & Bias for Action

PROFESSIONAL EXPERIENCE

PlanetSpark — Gurugram

A B2C subscription marketplace (EdTech) connecting 150,000+ enrolled users with teachers via a shared LMS — spanning consumer app, two-sided platform, payments, CRM, renewals, and lifecycle products, with 30,000+ daily active users. Progressed across three roles while owning an expanding product surface.

Product Manager

Sep 2023 – Present

- Led 0-to-1 product builds end-to-end, from scoping to execution — launched the consumer app MVP in 2 months and re-architected the sign-up to payment to enrolment flow (single-step OTP, a ranking model, and 6 API-integrated payment gateways) — going deep with engineering on technical solutioning and scalable functional flows.
- Own the full product suite for a platform with 150,000+ users and 30,000+ daily actives, leading cross-functional projects across engineering, operations, and product from discovery to launch.
- Stitched together systems and external-partner integrations — payment, messaging, telephony, and video vendors via their APIs — and consolidated multi-channel support into one system with a RAG-based assistant, cutting first-response time from 4 minutes to under 10 seconds.
- Built an advisor-level P&L and performance tracker, using SQL and Power BI to turn operating data into decisions that grew profitable advisors from ~50 to 125 over three months.

Assistant Product Manager

Sep 2022 – Aug 2023

- Translated business requirements into scalable functional flows: automated enrolment, verification, and backend-punching workflows (manual punching 100% to ~2%), cutting operations workload 80% and saving Rs 1.6L/month.
- Built the LPP (Learn, Practice, Perform) module 0-to-1 — driving 20% revenue growth and 25% ARPU expansion (Rs 35K to Rs 45K).

Senior Product Analyst

Mar 2021 – Aug 2022

- Wrote SQL queries and built Power BI dashboards (from Metabase data) across growth, revenue, and operations for data analysis, troubleshooting, and product decisions.
- Implemented customer and transaction-verification controls that reduced invalid or fraudulent transactions from ~10% to 1% with minimal manual intervention.

TECHNICAL SKILLS & TOOLS

- Data & Analytics:** SQL, Metabase, Power BI, GA4, MS Excel (Advanced)
- Tech & Integration:** REST APIs, third-party API & payment-gateway integration, backend systems, workflow automation
- Product & Delivery:** JIRA, Confluence, Agile/Scrum, RICE prioritization, PRDs, roadmap
- AI & Tools:** Claude Code, LLM APIs, Prompt Engineering, RAG, Figma
