PROFESSIONAL SUMMARY

Product Manager with 5+ years building and scaling user-centric consumer products end-to-end — from identifying high-impact opportunities to driving execution at scale (zero-to-one and one-to-many). Defines product vision, strategy, and roadmap with leadership; partners cross-functionally (engineering, design, marketing, sales); grounds decisions in market research and customer feedback; writes crisp PRDs/BRDs; and monitors post-launch performance to keep improving. Entrepreneurial, high-ownership, with a bias for action. Track record of 20% revenue growth and ₹70L in renewals.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram • Mar 2021 – Present

Own the full product suite of a B2C consumer marketplace connecting students and teachers via a shared LMS — consumer app, LMS, sales CRM, and an in-house AI layer — from product vision and roadmap through execution at scale, working closely with leadership and cross-functional teams.

Strategy, Roadmap & 0→1 to 1→Many

- Defined product vision, strategy, and roadmap aligned to business objectives; led the zero-to-one launch of the consumer app MVP in 2 months, then scaled the product (one-to-many) across app, LMS, and growth surfaces.
- Identified high-impact opportunities and drove execution: built the LPP monetization module (20% revenue growth, 25% ARPU ₹35K → ₹45K) and an in-product renewal engine (₹70L renewals in a single month).
- Re-architected the sign-up → enrolment funnel (single-step OTP, best-fit ranking, 6 payment gateways) to lift conversion and user experience.

Customer Insights, Documentation & Delivery

- Conducted market research and gathered customer feedback (behavioral analysis, segmentation, funnel analytics) to understand user needs and pain points, and turned them into new features and improvements.
- Wrote detailed PRDs and BRDs, oversaw the product development process from conception to launch with cross-functional teams (engineering, design, marketing, sales), and adjusted plans to hit goals.
- Monitored post-launch performance metrics (SQL via Metabase → Power BI, GA4, A/B testing) to identify areas for improvement and ensure products met user and business objectives.

Innovation, Automation & AI

- Continuously sought enhancements that drove growth and satisfaction — organic acquisition loops (2,000+ leads/month at 7% conversion) and a counselor-wise P&L tracker for unit-economics visibility.
- Shipped a production GenAI layer and automated core processes (verification, incentives), cutting operational workload 80% and cutting fake sales from 10% to 1%.
