PROFESSIONAL SUMMARY

Product Manager with 5+ years whose core is growth and monetisation — turning a free, habit-forming product into sustainable revenue without breaking user trust. Built the monetisation engine (20% revenue growth, 25% ARPU expansion), a subscription/renewal engine (₹70L in a single month, trial mechanics, renewal optimisation), and the free-to-paid conversion funnel. Runs A/B testing end-to-end, owns monetisation metrics (ARPU, conversion, LTV, retention), and understands ARPU and retention are coupled — for a price-sensitive, UPI-first Indian market.

PROFESSIONAL EXPERIENCE

PlanetSpark — Product Manager

Gurugram • Mar 2021 – Present

Own the full product suite of a consumer (D2C) marketplace connecting students and teachers via a shared LMS — with end-to-end ownership of monetisation: pricing/packaging, the subscription/renewal funnel, free-to-paid conversion, and the experimentation engine behind them.

Monetisation, Subscription & Free-to-Paid Conversion

- Built the monetisation engine (LPP module) — pricing and packaging for a price-sensitive market — driving 20% revenue growth, 25% ARPU expansion (₹35K → ₹45K), and 50% higher revenue per class.
- Designed a subscription/renewal engine — trial mechanics (LMS free-trial classes), nudges, early-bird access, and renewal optimisation — that generated ₹70L in renewals in a single month without eroding engagement.
- Owned the free-to-paid conversion journey end-to-end (first open → first payment): re-architected the sign-up → enrolment funnel (single-step OTP, best-fit ranking, 6 UPI/card payment gateways with pre-filled links) to lift conversion.

Experimentation, Metrics & Instrumentation

- Ran A/B testing end-to-end across monetisation surfaces (pricing, placement, copy) — knowing what valid looks like and what to do when results are inconclusive — from a hypothesis backlog with defined expected outcomes.
- Owned monetisation metrics and funnel instrumentation: ARPU, conversion rate, LTV/unit economics, and retention — built Power BI dashboards from Metabase SQL and a counselor-wise P&L tracker, turning data into an actionable insight pipeline.
- Grew revenue while protecting engagement — organic acquisition loops (2,000+ leads/month at 7% conversion) and retention-led renewals — because ARPU and retention are coupled.

Indian Consumer, AI & Ownership

- Built for Indian consumer behaviour — price sensitivity and UPI-first payments — integrating 6 payment gateways (Razorpay, PayU, PayGlocal, PayPal) with UPI/card support.
- Shipped a production GenAI layer and automated core processes (verification, incentives) — cutting operational workload 80% — operating with high ownership from zero-to-one.

CORE COMPETENCIES

Growth & Monetisation • Subscription & Renewal Funnel • Pricing & Packaging • Trial Mechanics & Renewal Optimisation • Free-to-Paid Conversion (First Open → First Payment) • A/B Testing & Experimentation Engine • Monetisation Metrics (ARPU, Conversion Rate, LTV, Retention/Churn) • Funnel Instrumentation & Dashboards • Hypothesis Backlog & Actionable Insight Pipeline • SQL & Data-Driven Decisions • Indian Consumer Behaviour, UPI-First Payments & Price Sensitivity • High Ownership (Zero-to-One)

TECHNICAL SKILLS & TOOLS

- Monetisation & Growth:** Pricing/packaging, subscription & renewal funnels, trial mechanics, free-to-paid conversion, ARPU/LTV/retention, funnel optimisation
- Experimentation & Data:** A/B testing, hypothesis backlog, SQL, Metabase, Power BI, GA4, dashboards & instrumentation, MS Excel (Advanced)
- Product & Delivery:** PRDs, roadmap, RICE prioritization, JIRA, Confluence, Agile/Scrum; payment-gateway integration (UPI/cards)
- AI & Prototyping:** OpenAI / Gemini / Claude APIs, Prompt Engineering; Figma, wireframing, clickable prototypes
